

# The North Lincolnshire Plan

**Vision:** North Lincolnshire is a healthy place to live where everyone enjoys improved wellbeing and where inequalities are significantly reduced. People achieve the best health and well-being that is possible, delivered within the resources available. More care is delivered in or close to people's homes. People feel able to self-care and are supported to do so. Services are proactive in their approach to enable people to remain independent for as long as possible

Striving to develop;  
Aspiring people  
Inspiring places

## Step changes to delivery

Reduction in acute care capacity – beds and outpatient facilities	Increase in primary, community and social care capacity – delivered in integrated way	New approaches to commissioning and provision	
Ambitions	Interventions	Timescale	Outcomes
